Stabilization**

Date: 4/11- Restrictions: None

**Video Stabilizer (Electronic)
MODEL # ILS-6000**

*High -Performance
Cost Effective
Video Stabilization*

Features:

- Stabilizes Video Signals
- Corrects for a wide range of Frequencies
- Full Color Video Processing
- Passes Video on loss of Power
- Weatherproof Housing
- Low Latency
- 12 Vdc Operation
- Pal or NTSC
- Only 1.25 Lbs

\$1850.00

Specifications:

Power:	8 to 60 Vdc @ 2.5 Watts
Video Input:	1 V P-P
Video Output:	75 Ohm
Operating Temp:	-30° to +70°
Stabilization Connection:	Translation & Rotation
Latency Output:	2 Frames
Size:	5.68 x 2.68 x 1.99"
Weight:	1.25 Lbs

Description:

Here is an affordable way to stabilize a video signal coming from a Robot, Helicopter, UAV, or police vehicle cameras. Using the latest embedded processing technology and algorithms to deliver state-of-the-art, real-time video motion stabilization. By automatically processing adjacent video frames in real time, the ILS-6000 turns shaky, unclear video into crisp, clear actionable information.
