Description:

Now! A digital camera designed in a rifle scope for versatility and ease of use. One unique feature of this rifle scope is the Video in & out. The video input maybe used for training purposes by feeding in video scenarios of a "Shot" or "Not shot". On the range, just feed in the video, a blank in the chamber, and see how your guys are shooting. The scope has switch able reticles for ease of seeing and personal comfort. This unit is the latest of optics and electronics put together for shooting. Oh!, The video output maybe feed into a miniature video transmitter for further training expediencies.
