Dual Deck DVD Recorder/Player/ Editor

\$4495.00

The PRV-LX1 is the newest professional DVD-Video recorder from Pioneer, the world leader in DVD technology. It features simple operation with a wide range of features and functions that complement any video production environment. This award winning industrial recorder gives you

everything you need today, with a future-proof modular design for adding the features you'll want tomorrow.

Pioneer's PRV-LX1 comes equipped with a 120GB internal hard disk drive and one DVD-R/RW recordable drive. You can add an optional second DVD-R/RW drive if desired. The PRV-LX1 is designed to quickly and easily record video from all professional video sources onto DVD-R or DVD-RW media without the need for a PC or authoring system. This industrial recorder is designed to meet the needs of a wide variety of video and post-production environments and easily tackles one-step conversion of video assets to DVD, easy authoring of video projects and archiving video to the highly compatible DVD-Video format

**All DVD Kits are supplied
with Stereo audio systems**

DVD Interrogation Room Recording Kit.

\$2795.00

This is our new digital recording system using DVD technology. This approach utilizes standard, inexpensive, off the shelf DVD-R disks.

Recording time is controlled by the resolution desired. Normally 4 Hr (LP) is used so that it can be played

back on any progressive scan player.

A front panel input is also included to download your photo's or video from a camcorder. The independent DVD duplicator is recommended, however, they can be duplicated on your standard computer with a DVD burner. The advantage of the duplicator is that it is quick and no alterations can be made to the original disk.

The optional distribution amplifier is used to send the interrogation to other offices.

Playing back CD's on your computer that were recorded on the new interrogation room digital recording package instructions

**Digital DVD Video & Audio Tape
Recording Kit
\$3490.00**

This is the latest in interrogation room recording systems using the new DVD technology and standard audio tape recording. Video recording time is controlled by the resolution desired. Normally 4 hour (LP) mode is used so that it can be played back on any progressive scan DVD recorder.

The dual deck audio recorder uses standard audio tape known to all transcribers. It is easily downloaded to computer software programs.

The independent DVD duplicator is recommended, however they can be duplicated on a standard DVD computer burner. The duplicator is quick and easy. An optional distribution amplifier is used to send the audio and video to more than one office at the time of the interrogation.

**New! Transcribing software and Hardware.
Includes Software and foot pedal
Just \$250.00**

**Advanced All Digital Video & Audio Recording System.
\$3895.00**

This new interrogation recording system incorporates the latest industrial/professional grade equipment available.

The DVD-R recorder is a progressive type recorder which should be compatible with all court playback players. The new audio recorder uses standard CF memory cards and is supplied with one 64 Mb card.

The memory card can be directly plugged into your computer via a card adapter and be downloaded to the computer for transcription. The recorder does have a direct cable connection to a computer. It further has RS-232 connections for remote operation.

The Distribution amplifier allows send the video/audio to more than one office.

\$699.00

DVD Duplicator

A must for all DVD systems

The Quick Disc is a low cost, performance oriented on to one DVD/CD Recordable duplication system from Microboards Technology, LLC. With its user friendly one button operation, sleek desktop footprint, and office environment aesthetics, the QD-DVD is perfect for any user requiring easy copying and backup of data onto DVD media. Superior technology allows the Quick Disc to ship without a hard drive; duplication of DVD is done on the fly. LED indicators provide the user with status of the duplication process, thus minimizing the number of faulty discs. Current high speed DVD Recordable technology is supported at 4X, while CD recording is at 16X.

Optional Componets

KSM-10C Color Monitor wit audio

The KSM-10 is used to display the video and audio while the interrogation is in progress. The monitor is a 14 to 15" monitor with video & audio pass through amplifiers. Pass through allows the signal to be sent to another monitor in an office or the WC's office.\

KSM-10C Monitor \$495.00

KSM-CATV RF Distribution Module

This module allows the signal from the interrogation room monitor to be passed to your CATV network by placing it on a channel that is not being used. Up to 4 channels (Cameras) maybe programmed into this module.

KSM-CATV \$595.00

KSP-PIP

This optional module allows viewing of two cameras at the same time and saving the image on the video tape or CD. This option is popular for those who desire to get a close up view to the suspect during interrogation. Unit passes color with ease.

KSP-PIP \$595

Whisper II \$495.00

The new Whisper II (whisper mic) is ideal for those situations where maximum noise immunity is required. It operates on external power from 6 to 15 volts and has full internal filtering and regulation. The single channel unit is only 1½ x ¾ x ½ inch. Various size boxes are available on special order. The all metal construction allows for use of our unique locking input connector and provides excellent noise immunity. Two microphones are supplied with RCA type output jacks. For interrogation room applications we suggest using our dual coax cable for ease of installation.

Whisper Microphone - 1 Mono

The Whisper microphone is a low noise, very sensitive microphone that operates from 9 to 12 Vdc. The out put is at line level and covers the full audio range. It is supplied with all standard interrogation rooms.

Whisper Microphone \$250.00

DA-1 Distribution Amplifier

The distribution amplifier allows the video and audio to be sent to other offices at standard video and audio line levels. This unit has one video/ audio input and 4 separate outputs.

DA-1 \$250.00

MicroEar System

MicroEar
VHF Receiver

The MicroEar system consists of a very small audio receiver that fits directly into the ear of the interrogator. During the interview, other officers may forward questions to the interrogator covertly, and at the proper time the question are presented to the suspect. A great way to increase your effectiveness during interrogations. Systems includes: Transmitter, belt receiver, inductive loop, ear receiver & charger

Price: \$795.00

KSC-BW-1 Break Window Detector Camera

This unit can be used in many applications for surveillance or interrogation room applications. Uses our standard high resolution color camera.

KSC-BW-1 \$450.00

KSC-46C Thermostat Camera

This is another approach to hiding a camera in a thermostats used in many buildings. Again our high resolution color cameras are used.

KSC-46C \$450.00

KSC-1248 AC Outlet Camera with a switch

This is a variation of the standard AC outlet camera, but with a switch added. Incorporates our high resolution color camera.

KSC-1248AC \$560.00

Cameras

PIRC-20C Color Camera

This camera is shipped with all systems. It is a high resolution color camera with a field of view of 89 degrees. This camera is our work horse in interrogation rooms and jails. The specifications are: 12Vdc operation; 1 lux sensitivity; auto white balance; 400+ lines of resolution, and comes complete with power supply.

PIRC-20C \$450.00

Our new KSC-1247 AC outlet covert camera is the latest in high tech design. The camera looks out through the ground lug hole in the middle of the plate. The bottom hole serves as a mount place for the microphone. For standard operations, the outlet is mounted about 4.5' from the floor. A 1/4 watt video transmitter may also be mounted to the outlet. Add \$250 for audio. Video Transmitter \$2395

KSC-1247 \$560.00

This new covert camera has lots of possibilities; interrogation rooms, hotel rooms, and office operations. This unit comes with color or B/W cameras, and may also be fitted with a small 1/4 watt video transmitter. Built-in microphone. Color is a high resolution camera.

Our B/W model KSC-45B/W for \$350. Color \$450.00

Our new Smoke Detector line of covert cameras are available. This comes in two configurations. First the camera can look straight down, like looking at a cash drawer or one that can look out a 45 degrees. Please specify the angle of the camera when ordering.

Our B/W Model KSC-10B/W \$350. Color \$450.

KSCC-1 Phone outlet Camera

This is the latest covert camera design to be used in interrogation rooms. Fitted with an 8 to 16 mm lens, a suspect's face can be photographed with ease. This camera is to be placed across from the suspect in the wall at about head height. Please specify distance from wall to suspect.

KSCC-1 \$495

Typical Installation

Sound Absorbing Material

This material reduces the "Echo" effect in the room. Thus, reducing after interview tape costs of removing distortion. Just "snap" your fingers in your room, Does the sound echo back? If it does, you need our sound absorbing system. The material is placed in the center of the the walls around the room. The material is glued to the walls and covers a 6' 7" strip the center of the wall leaving a small gap at the top and bottom of the wall. This procedure will dampen all sound generated in the room. If noise is being generated outside the room, that wall should also be covered.
