Monitor:	7" LCD Color Monitor
Channels:	24
Resolution:	640 x 480 @ 30 FPS
Modulation:	Digital GFSK
RF Power:	50 mW

Description:

This new surveillance system incorporates the latest low cost video microwave designs. This is the first of a series of video transmitters and matching receivers that maybe used in surveillance and security systems. Over the years, PD's have asked me for a simple camera & recorder device that a standard officer could set-up in his front & back yard for security reasons. Well, here is the system. Also, just take our new transmitters and add one of our covert cameras and microphone systems and use it in hotel rooms for buys and interrogations. (See the 1100 series products)
