Description:

Tracking made simple. Our new tracking system works in 5 second or 10 second LIVE up dates. The units are very small and are easily installed under the dash. The VT-X5 is designed for fleet management of police cars and will deliver quick and accurate location and activity of your police cars. The 4 I/O's are available for status situations such as: code 3, shot gun removal, suspect in back seat, & vehicle shut down. The PT-X5 PRO comes with an extended battery and heavy magnet in a Pelican case for ease of quickly installing on a vehicle. Call for prices on other models
