	Add \$200.00

### Description:

This design is the result of frequent requests for a simple video display of our day/night pocket scope and our new day/night rifle scope on sun readable digital monitor.

When used with our day/night scopes, meth labs maybe observed, narcotics operations, border activity, gang operations & general surveillance and recorded.

We have found that the video output that is displayed on a larger monitor may display much more detail of the scene under observation.

Our optional DVR maybe installed at time of purchase. Both video and audio are recorded on SD cards up to 32Gb.
